SHASHIBO®

SHAPE GUIDE

Can you master the Shape Shifting Box?
Explore the 70+ Shashibo shapes and
check off which ones you have created.

Inventor Spotlight

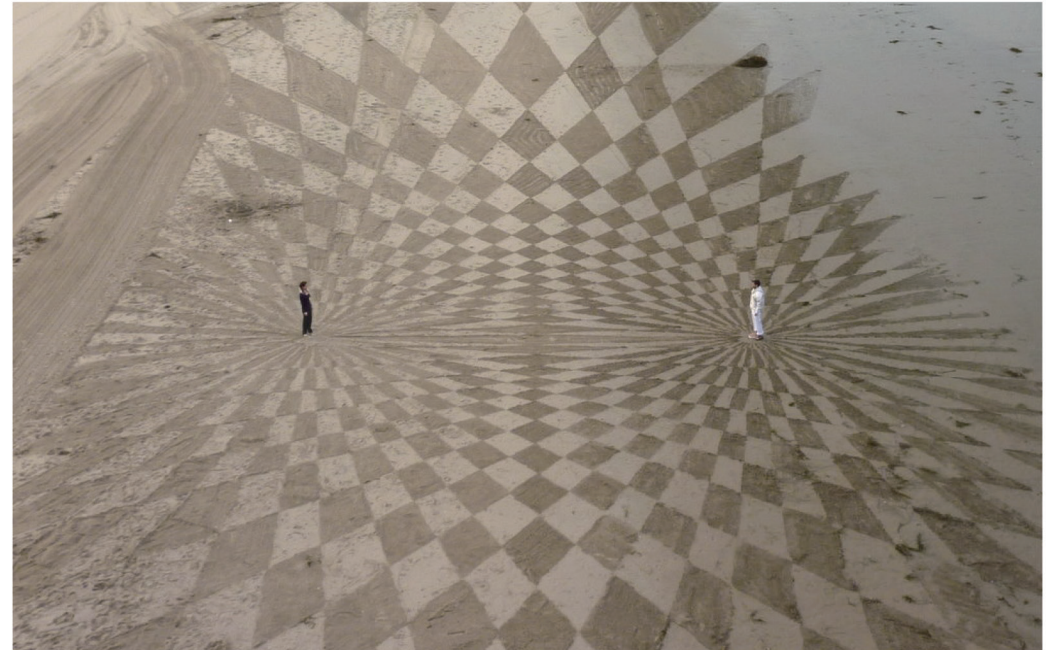

Invented by
German artist,
Andreas Hoenigschmid

"It's the toy I have been wanting to play with my entire life."

Born and raised in Germany and now living in California, Andreas has always been inspired by his love of design, geometry, and art to create a magnetic puzzle toy that would be accessible to people of all ages and walks of life – even those vision-impaired.

Fun Fact: Andreas is also a sand artist!

ARE YOU READY TO MASTER THE SHAPE SHIFTING BOX?

Explore & Discover

Discover over 70 shapes & possibilities! Gently let your Shashibo fold through itself until you feel the magnets connect. If they connect, then you know you have created one of the shapes! See our videos for help.

Getting Started - How to Open:

Shashibo can only be opened on 2 of its 8 corners. Start at one of these corners by gently pulling it open like a pistachio.

How to Close:

There is a trick to getting Shashibo back to its original cube shape. Use the outer pattern when it was closed as a cube as a guide, and see if you can figure out how to connect the corners back to a box shape!

Warning!

This toy contains magnets or magnetic components. Magnets might impact the function of electronic devices. People with pacemakers are not recommended to play with this toy to avoid any possible impact to the pacemaker.

MAGNETIC POWER

Each Shashibo is powered by 36 rare earth magnets. This allows you to collect and connect more to combine many Shashibo to create larger shapes with limitless possibilities.

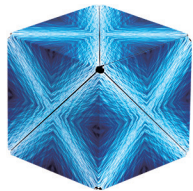

COLLECT THEM ALL!

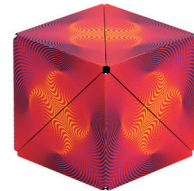

Shashibo's strong magnet system allows you to combine with other Shashibo to create larger structures and shapes. Start building your Shashibo tower!
